

Accelerate customer engagement with Financial Cloud Communication

Send personalised communication at scale

Our enterprise communication platform is trusted to process millions of SMS, emails, and letters every day on behalf of some of the UK's leading financial services companies. Financial Cloud makes it easy to send highly effective communication to the right customers, at the right time.

Key features and capabilities

Deliver effective communication

Using smart segmentation you can target specific customer attributes to send personalised content to the right people, at the right time.

Send highly personalised automated messages

Leveraging real-time activity, interactions and customer data.

Drive consistency with templates

Easily create custom-built templates whether communicating via email, SMS, letter, or other channels. Messages remain consistent and personalised, ensuring a coherent customer experience across all touchpoints.

Deep insights at your fingertips

Instant access to easy-to-understand reporting and deliverability analytics to highlight the success of your communication sends.

Optimise your communication process for enhanced customer engagement.
